For Delivery Vans & Work Vans

The ALFO "MOVER" is a safe, easy method to arrange and transport all types of cargo inside a delivery vehicle. The system is ideal for pallets, boxes, containers and other bulk cargo (large or small) to be moved or rearranged effectively, efficiently and effortlessly.

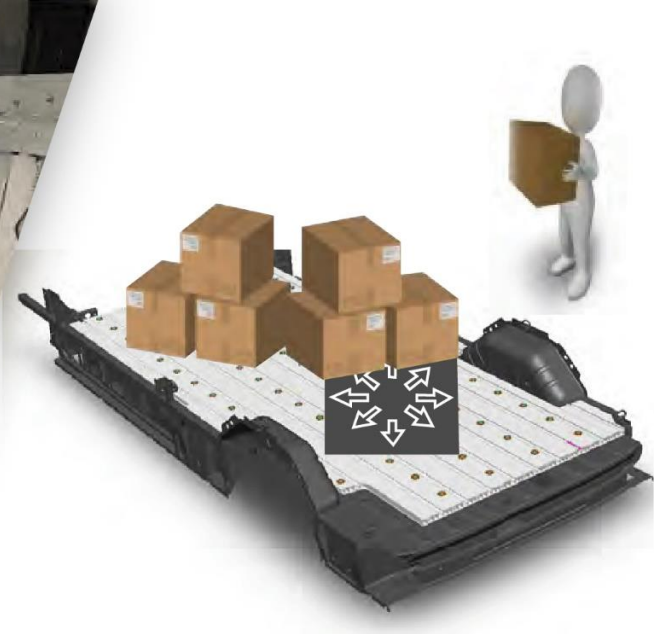

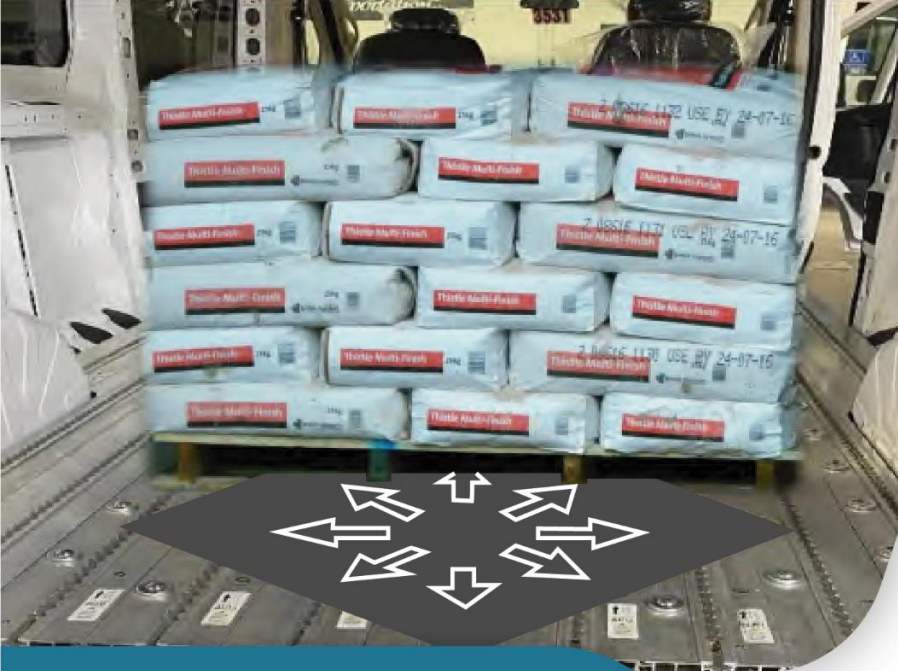

Physical exertion is most definitely reduced, while manpower efficiency is greatly enhanced.

The sturdy aluminum flooring is fitted with approximately 140-160 'transfer rollers.' Each roller can withstand a load of 125 lbs which makes the system ideal for heavy load applications, especially pallets.

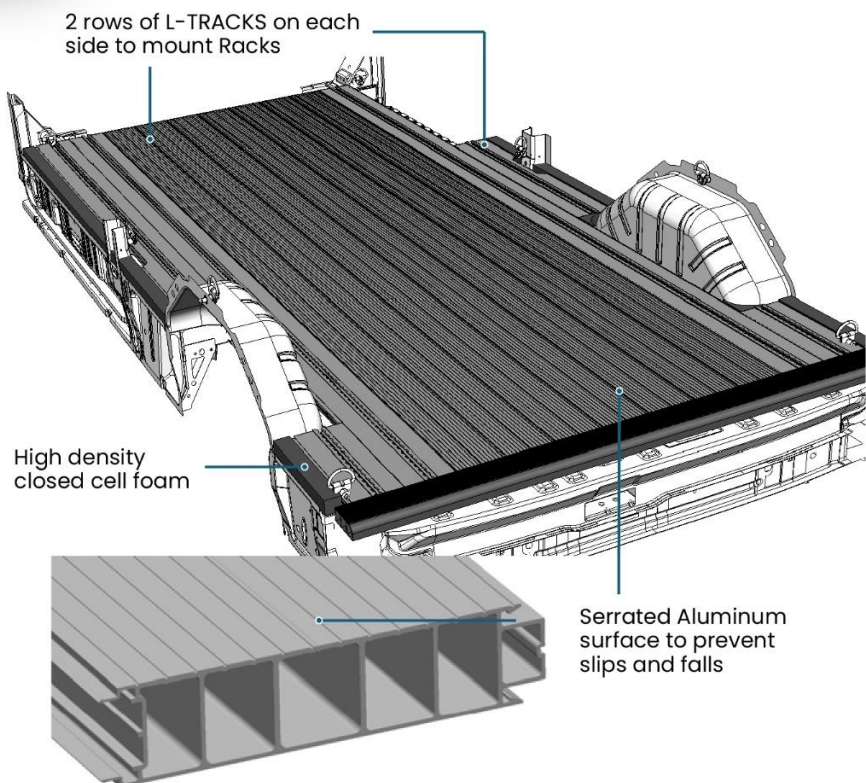

Unique, the ALFO platform installation process is NOT Glued to the vehicle floor and therefore can be interchanged with alternate 'ALFO Non-Roller' and/or 'ALFO No-Track' panels, whenever you choose.

ALFO™

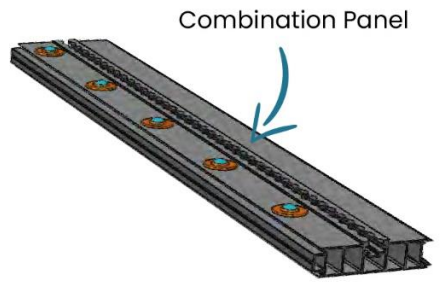

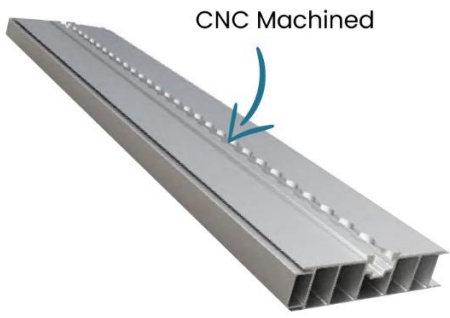

**Aluminum Flooring System
Mover & WorkVans**

ALFO WorkVans

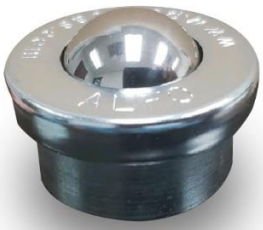

- ✓ Takes an hour to install, No Glue necessary.
- ✓ Passenger seats can be mounted, if desired, meets FMVSS 207/210

PANEL with L-TRACK

NO-Track Panel
35% lighter and less expensive

L-TRACK Panel with Rollers

Each roller is made of stainless Steel and is tested for continuous operation for 30,000 hours in high humidity and high temperature @ maximum load. ALFO'S Quality testing provides unmatched durability.

ALFO LOCK BRACKET to prevent the cargo from moving in the Van. Any standard L -Track tie down can be used to snap and tie the cargo down into the Track.

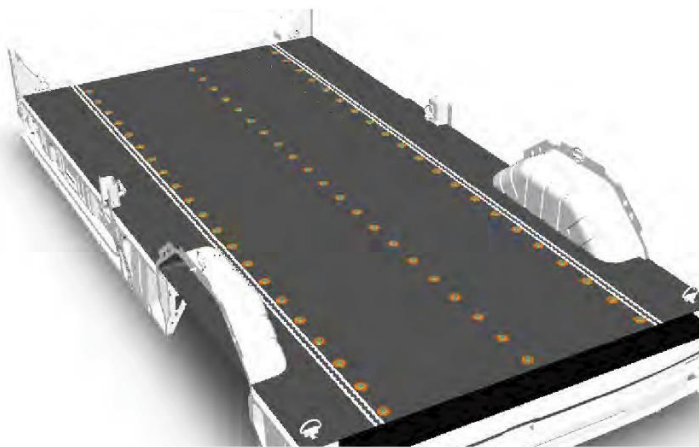

A Few Combinations of ALFO Mover & WorkVans

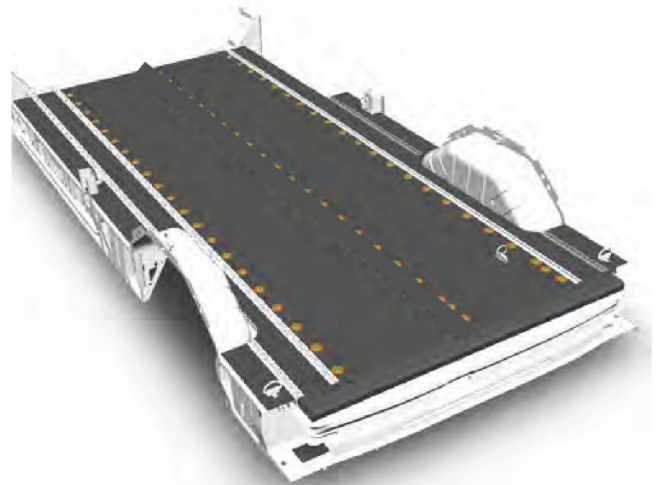

5 rows of L-TRACKS with 3 rows of Roller Panels

All rows of L-TRACKS with all rows of Roller Panels

2 rows of L-TRACKS with 3 rows of Roller Panels

4 rows of L-TRACKS with 3-rows of Roller Panels
